

CIBSE Membership Fact Sheet

Educational base for Engineering Technician Registration – L22

Having demonstrated that you have the required professional experience and competence for Licentiate membership of CIBSE, you may be eligible to register as an Engineering Technician (EngTech) with the Engineering Council UK. This fact sheet lists centres offering courses which will satisfy the educational base for EngTech registration.

Route A

The Engineering Council UK academic requirements for EngTech registration are:

- **National Certificate or National Diploma in Engineering or Construction & the Built Environment (listed below)**
- **Approved qualification in engineering or construction at level 6 in the Scottish Credit and Qualifications Framework (SCQF) (further details on www.sqa.org.uk)**
- **The City & Guilds Higher Professional Diploma in Engineering (further details on www.city-and-guilds.co.uk)**
- **A technical certificate as part of an approved Advanced Modern Apprenticeship Programme**
- **An approved level 3 NVQ or SVQ**
- **A work-based learning route approved by a licensed professional engineering institution**
- **or an accredited BEng(Hons) degree**

For those who qualified or began their studies before September 1999, the academic requirement is a Higher National Certificate/Diploma or foundation degree. The HNC/HND must include 8 level H units in subjects relevant to engineering, including a project.

Please refer to lists below colleges and universities offering degree courses accredited by CIBSE and HNC/HND courses which may in part or full satisfy the educational base for IEng registration.

Please note that the Institution accept courses accredited by other Engineering Institutions. For a complete list, please refer to the EC^{UK} website, www.engc.org.uk.

Overseas qualifications

The UK equivalence to overseas qualifications is established by the Individual Case Procedure panel. If additional study or alternative route is required, advice will be given.
