Loughborough University
School of Civil & Building Engineering

How to get here

BY CAR

• M1 Junction 23.
• From the M1 take the A512 (eastwards) towards Loughborough.
• At first Roundabout (Holywell Park) - turn right (NOTE - this is at the LEFT of the web map – not the main entrance at the right).
• Travel approx 90 metres and stop at gatehouse. You will be given a visitor’s pass and instructions by Security on how to find our building.
• Pass under archway formed by building and then turn left.
• The signs say “West Park” and “Sir Frank Gibb Building”
• You will pass our building on your right
• There is a multi-storey car park on the left at the end of the road - Car Park 1 which you may use. (Do not park on the road side – you will be clamped)

BY TRAIN

• Loughborough Railway Station

BY PLANE

• East Midlands Airport is around 20 minutes away by taxi

Taxi is easy and will cost around £8.00 - £10.00. It is better to ask the driver to drop you off at the University’s Ashby Road entrance (Engineering School) – you can’t come through the barrier in a car here, but our building is only 30m from this entrance, straight ahead of you. Alternatively, ask the driver to come into the University via the Holywell Park Entrance (officially called the West Entrance), off the A512 (then follow the instructions for car drivers above)

If the taxi takes you through the main University entrance it will take longer, cost more and you might get lost.

Bus is cheaper but takes a bit longer. The University Shuttle (Sprint) runs from the Station. Ask for the Engineering Faculty on the Campus. You will then get off within a few metres of the main Sir Frank Gibb Building. Then follow the box instructions to the main Reception.

Have a safe journey!

Please come to Reception - It is the ‘Sir Frank Gibb building’ with a large ‘Civil & Building Engineering’ sign over the entrance – see picture, it is the 2nd building on the right as you go down the hill.

Reception, ground floor - Please tell the Receptionist that you are here for the BISPA launch and she will direct you to the Civil lab.
An online, interactive map of the campus can be found at http://maps.lboro.ac.uk
