in-house options

# What can in-house or bespoke training offer your organisation?

In response to demand from delegates across the UK, who have attended CIBSE's BIM Roadshow, we have introduced the 'in-house' CIBSE BIM Roadshow.

CIBSE is bringing the Roadshow to your office, enabling your team to participate in the full six hour programme. Address the issues of BIM on which you need guidance by commissioning this in-house training option. You can even have it tailored to directly address your company's requirements on specific issues or processes.

**As well as the full day training session, each attendee will takeaway:**

**Copies of the following Digital Engineering (DE) Series publications, worth £200:**

- DE1: Prequalification Questionnaires
- DE2: Employer's Information Requirements
- DE3: BIM Execution Plans
- DE4: Common Data Environments

**Other valuable materials including:**

- Seminar presentations with all project files
- Standards for BIM
- Templates and tools which accompany the DE guides

The detailed full day BIM Roadshow agenda can be found at:

**[www.cibse.org/BIMRoadshow](http://www.cibse.org/BIMRoadshow)**

### Option 1: One full day roadshow

**£2,500 + VAT\*** for up to 25 attendees

**£3,500 + VAT\*** for 25+ attendees

The full six hour BIM Roadshow seminar presented to your staff over one day. This training is CPD accredited.

Visit [www.cibse.org/BIMRoadshow](http://www.cibse.org/BIMRoadshow) to view the detailed agenda.

### Option 2: A senior team overview

**£1,000 + VAT\***

A two hour presentation for an audience of your choice, aimed at senior team, managers and project directors.

The overview presentation can be delivered as a breakfast briefing, as part of a management meeting, away day, or part of partner and supplier day.

### Option 3: A senior team overview + Roadshow

**£3,500 + VAT\***

A two hour presentation to an audience of your choice followed by a more detailed full six hour roadshow with (up to 25 of) your employees who work on projects.

### Option 4: Bespoke courses

CIBSE can tailor any of the above options to meet the specific needs of your company. We meet with your team to pinpoint requirements and provide bespoke course(s) which will help you optimise value to your organisation. Individual quotes are provided for bespoke courses.

**Where:** We can deliver in-house courses at your offices, in one of our training rooms, or your choice of venue anywhere in the UK.

To book an in-house course or discuss your company requirements contact Amy Emmett at:  
[AEmmett@cibse.org](mailto:AEmmett@cibse.org)

\*Travel costs, room hire and catering, are not included in the prices.

“

**Troup Bywaters + Anders**

It was a brilliant day packed full of information aimed directly at the MEP industry. Everything was relevant. A refreshing change, as most seminars come from a BIM point of view.

”

“

**SDS**

The day was really interesting; Carl was really approachable I asked quite a few questions over lunch that he was happy to answer.

”

“

**Applied Energy**

This is a useful course for the BIM driver within the company to understand the concepts of Level 2 from a commercial business perspective down to some of the relevant technical detail.

”

“

**Johns Slater and Haward**

This was a great overview as to the BIM process and requirement that we need to embrace.

”

“

**Hampshire County Council**

Overall an excellent day with the right contents and coverage of all of the relevant topics.

”

“

**Max Fordham LLP**

I thought Carl took a very pragmatic approach with his presentation. It was both interesting and informative.

”

“

**DPL Group**

Much more relevant for Building Services Engineers. The problem with previous regional BIM events I have attended is that they are all aimed at Architects.

”

“

**University of Bristol**

A well put together day, covering a lot of ground.

”

“

**Elementa**

I like the fact that for once, it shows the perspective on BIM of the Building Services Engineer!

”
