

August Newsletter

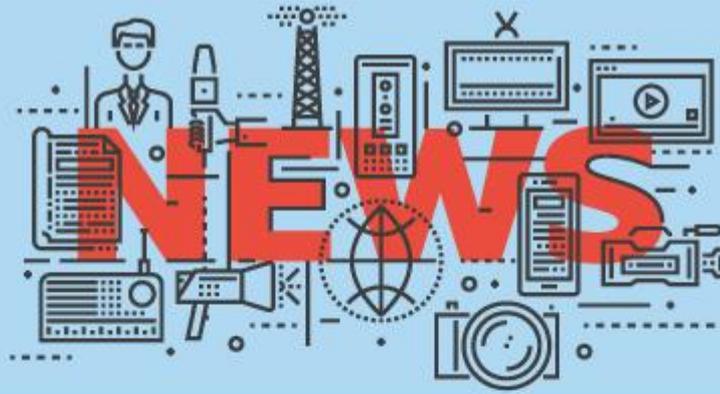

Dear Member,

Welcome to the first edition of the new CIBSE ANZ Newsletter.

As a member of the CIBSE ANZ Region, we would like to update you on some exciting news and upcoming CIBSE events which we think may be of interest to you.

From all of us at CIBSE ANZ,

Have a great month.

Mick Gardner

New Chair for the CIBSE
Wellington Chapter

New Chair for the CIBSE Wellington Chapter

CIBSE ANZ would like to welcome Mick Gardner to the role of chair for the Wellington Chapter. Mick has recently relocated from the UK to New Zealand and is a Senior Mechanical Engineer for Beca. Mick is keen to promote CIBSE and the Building Services Profession to future engineers to ensure the industry stays in good hands.

Mick has been busy organising the next technical event for the chapter – Fire Engineering and the WELL Building Standard. The seminar will provide an overview of the requirements for CIBSE Guide E: Fire Safety Engineering, and how they relate to New Zealand building standards. Steve Hennessy, building services engineer and sustainability consultant, will also give an introduction to the WELL building rating system and the implications for new and existing buildings.

All CIBSE members and industry guests are welcome to come along. This is also an opportunity to meet Mick and members of the ANZ regional committee for drinks and networks following the seminar.

If you would like to be part of the CIBSE Wellington Committee or get involved in other ways, please get in touch with Mick at MGardner@cibse.org.au

ANZ Educational Subcommittee

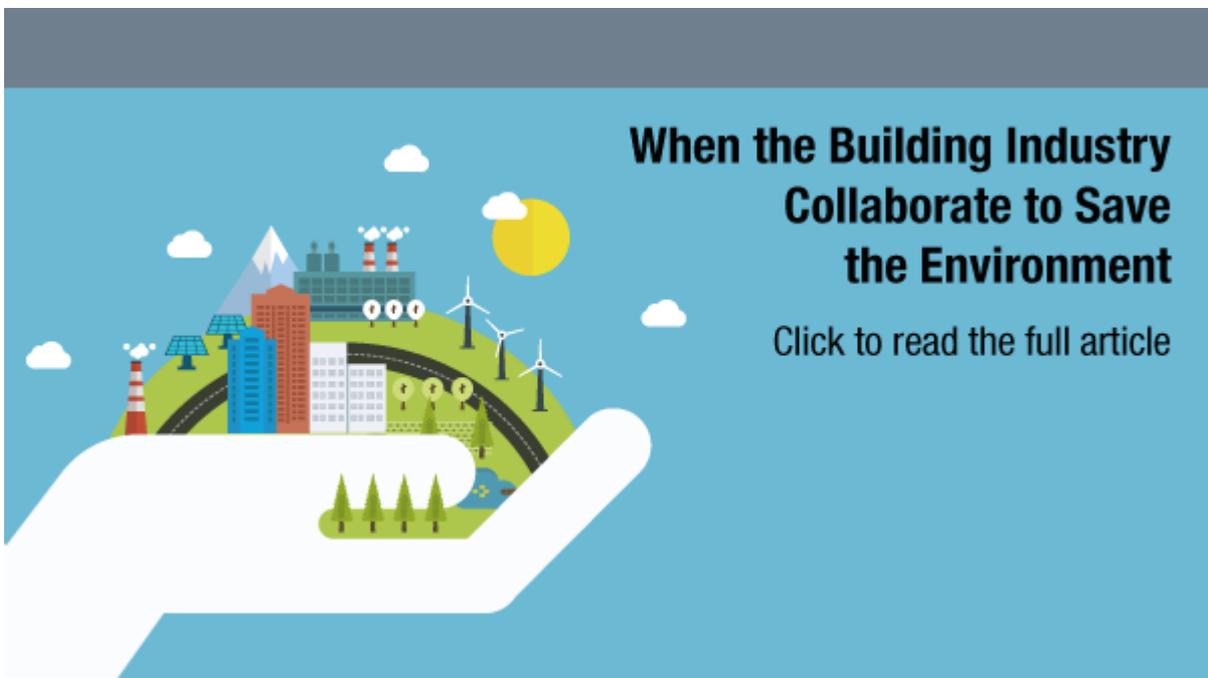

Call for interest

Are you passionate about advancing skills in the building services industry?

CIBSE ANZ is about to expand its training and education services capabilities. We are seeking a range of industry specialists to work with us to significantly advance the training and education professionalism of the building services industry.

If you are interested in helping CIBSE ANZ to expand the skills and knowledge within our industry, plus you have the passion to pass on your experience to the next generation of building services professionals, then we want to hear from you.

When the Building Industry Collaborate to Save the Environment

With a threat of climate change imminent, it will take the unified voice of the built environment to affect change and mitigate that threat. PRIME (Professionalism, Regulation, Information, Measurement, and Emission abatement) is that voice for the built environment in Australia. CIBSE have joined forces with the property sector, manufacturers, and other professional institutions and organisations, all with a similar drive to reduce the environmental impact of heating, ventilation, air conditioning and refrigeration of buildings.

CIBSE ANZ - 30 Years and Counting

It's been 30 years since the Australia and New Zealand region of CIBSE was inaugurated. The faces of the ANZ committee have changed, but the passion driving our region forward is still as relevant as ever. In times where the pulse of change beats fast, CIBSE continues to provide industry with the guidance and training for safe, comfortable and efficient buildings.

Earthquake Design

Every 10 years (on average) Australia faces 1 shallow earthquake of magnitude 6 or above - equivalent to the 2011 Christchurch earthquake. Designing building services to withstand earthquakes is critical for certain buildings. At a CIBSE SA event, Peter McBean, National President for the Australian Earthquake Engineering Society, shared his experiences, having provided structural engineering advice following the
