Dear Member,

With Easter Break upon us, sit back and relax with your CIBSE ANZ monthly eNewsletter. This month we ask some of our members and industry experts what Australian and New Zealand building services professionals could do to help achieve emission targets set out in the Paris Climate Change Agreement. You can also read about the charity CIBSE Australian chapters choose as their preferred for 2018 and download the presentations and lessons learnt from some of last month’s events.

Our voluntary committees are busy putting together the final touches for upcoming events around the region for May and June, a few are listed below to book on to now.

Wishing you a pleasant break filled with lots of chocolate eggs!

All the best,
The CIBSE ANZ team
Changing Climate Change

Before Young Engineers Awards submissions roll in from Student and Young Building Services Professionals, we asked members and colleagues the big question. How can Building Services contribute to the carbon reductions that Australia and New Zealand have committed to in the Paris Climate Change Agreement?
