THE CHARTERED INSTITUTION OF BUILDING SERVICES
The professional body that exists to support the Science, Art and Practice of building services engineering, by providing our members and the public with first class information and education services and promoting the spirit of fellowship which guides our work.'
• What we do best...

• CIBSE provides best practice advice

• CIBSE is a pioneer in responding to the threat of climate change

• Proud to be...

• CIBSE is the 6th largest Engineering Institution with over 20,000 members worldwide

• CIBSE is the prime source of expertise for sustainable buildings.

• We harness our members’ skills and knowledge to raise competence across the industry

• The future of building services

3
CIBSE provides best practice advice......

CIBSE is the standard setter and authority on building services engineering. It publishes Guidance and Codes which are internationally recognised as authoritative, and sets the criteria for best practice in the profession.

*Engineering a sustainable built environment*
CIBSE is a pioneer in responding to the threat of climate change

Buildings account for almost 50% of carbon emissions, yet innovative services design can bring dramatic improvements in energy efficiency. Our members continue to create the most environmentally friendly systems in major projects across the globe.

CIBSE Benefits
CIBSE Special Interest Groups

- ASHRAE
- Daylight
- Electrical Services
- Facilities Management
- Heritage
- Information Technology & Controls
- Lifts
- Energy Performance
- Project Management

- Combined Heat & Power
- Natural Ventilation
- Industry, Education and Training
- Healthcare
- Intelligent Buildings
- School Design
- Building Simulation
- Young Engineers Network (YEN)
- Homes for the Future
CIBSE Societies

The Society of Light and Lighting acts as the professional body for lighting in the UK.

The Society of Public Health Engineers (SoPHE) aims to provide a higher profile and focus for public health engineers within CIBSE.

The Society of Façade Engineering advances knowledge and promotes good practice in façade engineering.
CIBSE Regions and International Chapters

With over 20,000 members in 100 countries around the world, CIBSE members belong to a global network of professional support and expertise.

The Institution is organised on a regional basis - there are 16 regions in the UK and 4 overseas, in the Republic of Ireland, Australia & New Zealand, Hong Kong and the United Arab Emirates.

CIBSE’s presence continues to develop with international chapters based in Canada, China, Qatar, Singapore, and Sri Lanka.
The CIBSE Journal is the leading monthly magazine for building services and related professionals internationally.

It is the only publication circulated to all CIBSE members.
The Journal provides all the news, analysis, comment, features, technical articles, regulatory advice and learning tools needed by the wide range of professionals working in the modern building services world.

WWW.CIBSEJOURNAL.COM
The publications available from CIBSE range from the very technical through to the ‘hands-on’, and offer industry best practice on a wide variety of topics; from lighting to ventilation, solar shading to lifts, and much more.
Explore the new CIBSE Knowledge Portal at cibseknowledgeportal.co.uk
A new online resource which gives our members exclusive, instant and **FREE ONLINE** access to the full range of CIBSE documents as well as other content from industry-leading publishers.
3500 SELECTED CURRENT BRITISH STANDARD ABSTRACTS that you know you can rely on, and that you can access instantly, whenever, and wherever you want to.
Practical, user-friendly information and **INDUSTRY BEST PRACTICE** on a wide variety of topics.
CIBSE Briefing

The briefing was prepared by Andrew Hurley, Executive Director of the Association for the Conservation of Energy (ACE) and principal author of the definitive guide to the recast Energy Performance of Buildings (EPBD) Directive.

The original Energy Performance of Buildings Directive was adopted in 2002. The Directive has been revised several times since then and is now in force in all EU member states. The Directive sets out minimum energy performance standards for new buildings and requires improvements to the energy performance of existing buildings. The Directive also requires member states to establish a framework for the implementation of a national policy and strategy for energy efficiency and renewable energy sources.

The recast Directive is expected to be adopted in 2018. The Directive is expected to include a number of new requirements, including the requirement for member states to adopt a national strategy for the promotion of energy efficiency and renewable energy sources, and to establish a framework for the implementation of energy efficiency measures in existing buildings.

The recast Directive is expected to have a significant impact on the energy performance of buildings in the EU. The Directive is expected to set new targets for the energy performance of new buildings, and to require improvements to the energy performance of existing buildings.

The Knowledge Portal is **FREE TO ALL OUR MEMBERS**. You can **JOIN CIBSE FOR AS LITTLE AS £123.00 A YEAR**, and immediately access publications **WORTH OVER FIVE THOUSAND POUNDS**.
CIBSE Patrons

• Comprises nearly 100 companies from across the sector; £450 subscription

• Support a range of CIBSE educational initiatives

• Work placement scheme for young engineers

• Contribute to CIBSE working groups

• Range of events including annual lunch at House of Lords

• Patrons receive 50% discount on CIBSE publications and events

Find out more at www.cibse.org/patrons
Benevolent Fund

The relief of persons who are in conditions of need, hardship or distress and who are members or former members of the Institution of Heating and Ventilating Engineers or of the Illuminating Engineering Society of Great Britain or of the Chartered Institution of Building Services Engineers and the immediate dependants of such persons

Over the last year, the fund has been able to provide:

• Help towards funeral costs
• Urgent repairs to boiler to provide heat for the winter
• Removal expenses to move to an accessible property
• Work to relieve damp in home before winter sets in

How you can help:

• If you know of someone in need who meets the criteria, please refer them to the Fund (details below)
• As a CIBSE member, you can make a voluntary contribution with your annual subscription, designate any interviewer fees you receive to the Fund or make a direct debit (please request a form)
• Leave a legacy to the Fund in your Will
• Becoming an Almoner
