CIBSE Heat Network Consultant

Pre-requisites & Pre-course reading
This is a two-day course aimed at providing an understanding of the CIBSE Heat Networks Code of Practice (HNCoP) and how to apply it. Following the course there is the opportunity to take an exam which allows entry to the Heat Networks Consultant register.

This document sets out reading and preparation that is recommended in advance of joining the two-day training course.

You are strongly advised to undertake this preparation prior to attending the course. The suggested reading will be referred to and expanded upon during the training and you will therefore benefit from prior knowledge of these documents.

The suggested reading can either be downloaded from the links provided or from the free downloads areas of the CIBSE website (www.cibse.org/membersservices/downloads), or if you are a member the CIBSE Knowledge Portal (www.cibseknowledgeportal.co.uk). You will need to log in or register to get access to these areas.

**Suggested Reading**

- Bristol City Council (2018) Connecting to the Bristol Heat Network. Part 1: A guide for developers, building owners and architects and Part 2 – A technical guide for designers of building services (Bristol City Council)
• Frederiksen S. and Werner S. (2013) District Heating and Cooling (Lund, Studentlitteratur)
• Regen SW (Community-led Heat Projects: A toolkit for heat networks (Regen SW)
• Become a CIBSE Certification Heat Networks Consultant
