

Domestic Heating Design Guide - Worksheet A1 – Heat Loss Assessment (Building information)

Stage 1 - Job information

Job 100 Page 101 of 102

Number of heated spaces in the property 103

Stage 2 - Air permeability - see section 2.5.4.1

Building air permeability
(at 50 Pa) (m³/h·m²)

(Note) If measured (retrofit or new-build) or designed (new-build) air permeability data is available, this should be entered directly

→

206

=

(Note) If no air permeability test or design data is available, use this row to estimate infiltration rate value based on the default values from Table 2-11

→

=

Stage 3 - Notes

Notes about the property or the heat loss assesment

300
